PROFILE

I am a freshly graduated Computer Science student with a strong foundation in front-end web development, particularly in creating and managing WordPress websites. My hands-on experience includes building responsive and user-friendly web applications, utilizing technologies like HTML, CSS. I am eager to leverage my skills to contribute to Web development teams by crafting intuitive, customized web solutions.

SKILLS

Web Development: HTML5, CSS3, WordPress.
Database Management: MySQL

PROJECTS

Olive Driving School Website

olivedrivingschool.com.au

Developed and managed a user-friendly WordPress website for a driving school, ensuring a responsive design and smooth navigation.

Muneer Timber Mart Website

muneertimbermart.shop

Created a simple, informative WordPress website for a timber mart, focusing on clear presentation and accessibility.

FINAL YEAR PROJECT

Diabetic Retinopathy Detection through Image Processing

Title: Diabetic Retinopathy Detection through Image Processing

Description: Tested retinal images using a Machine Learning & Computer Vision CNN-based model.

Framework: Developed a web application using Django to detect and classify diabetic retinopathy.

EDUCATION

Bachelor of Computer Science

Institute of Space Technology (IST), Islamabad

Sep 2020 – July 2024
